SUBJECT INDEX

ACTH
  post-transcriptional action of, in the control of *P*450c17 expression in rabbit adrenal glands, 149
Adipose tissue
  lack of evidence for estrogen and progesterone receptors in human, 275
Adrenal zona glomerulosa
  effect of endogenous vasoactive intestinal peptide on maintenance of growth and steroidogenic capacity of, in rat, 81
Alcohol dehydrogenase
  the short-chain, superfamily, 125
Amniotic fluid
  17β-hydroxyprogesterone of, in early pregnancy, 315
Androgen(s)
  elevated adrenal, levels in dyslipidemic men, 307
  metabolism of, in the human prostatic cancer cell line LNCaP, 89
  receptor
    mRNA of, is up-regulated by testosterone in both Harderian gland and thumb pad of the frog *Rana esculenta*, 259
  regulation of insulin-like growth factor-I by, in rat uterus and liver, 57
Androstanediol glucuronide
  elevated levels of, associated with gemfibrozil treatment in dyslipidemic men, 307
Androstenedione
  stimulation of progesterone production by, in corpora lutea of pregnant rat, 191
Anterior pituitary
  biochemical parameters in the, during tumorigenesis induced by diethylstilbestrol treatment, 183
Anti-androgen(s)
  pharmacokinetics and metabolism of novel non-steroidal, in the rat, 47

Breast cancer
  effects of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin on estrogen metabolism in MCF-7, cells, 251
  steroid gradients across the cancerous breast: an index of altered steroid metabolism in, 175

Corpus luteum
  regulation of cytochrome $P450_{scc}$ synthesis and activity in the ovine, 283
Cortisol
  elevated levels of, associated with gemfibrozil treatment in dyslipidemic men, 307
Cytochrome $P450_{scc}$
  regulation of, synthesis and activity in the ovine corpus luteum, 283

Dexamethasone
  high levels of non-activated receptors in glucocorticoid-sensitive $S49_{wt}$ mouse lymphoma cells incubated with, 33
Diethylstilbestrol
  biochemical parameters in the anterior pituitary during tumorigenesis induced by diethylstilbestrol treatment, 183
1,25-Dihydroxyvitamin D3
  receptor
    activated by analogues MC903, EB1089 and KH1060, 137

Endometrial adenocarcinoma
  epidermal growth factor receptor in the human, cell line HEC-1-B, 41
Epidermal growth factor
  receptor
    in the human endometrial adenocarcinoma cell line HEC-1-B, 41

Epididymis
interaction of sex hormone-binding globulin with plasma membranes from the, of rat, 115
17β-Estradiol 4-hydroxylase
induction of, by 2,3,7,8-tetrachlorodibenzo-*p*-dioxin in MCF-7 breast cancer cells, 251
Estradiol
effects of, on the proteins secreted by the hamster cervix, uterus and oviduct, 107
Estrogen(s)
multiple novel, induced genes in the hypothalamus, 131
receptor(s)
androgen regulation of, in rat uterus and liver, 57
lack of evidence for, in human adipose tissue, 275
transfection of human, cDNA into ER-negative mammalian cell lines, 229
Estrogen receptor cDNA
transfection of human, into ER-negative mammalian cell lines, 229

c-*fos*
leucine zippers of, for progesterone receptor dimerization, 241

Gemfibrozil
treatment of dyslipidemic men with, 307
Gene(s)
hormonal regulation of hypothalamic, expression: identification of multiple novel, induced by estrogen, 131
microtubules are not required for glucocorticoid receptor mediated, induction, 143
Glucocorticoid(s)
receptor(s)
genetic analysis of the N-terminal end of the, hormone binding domain, 11
microtubules are not required for, mediated gene induction, 143
nanomolar concentrations of untransformed, in nuclei of intact cells, 291
non-activated, in $S49_{wt}$ mouse lymphoma cells, 33

Hormone binding domain
genetic analysis of the N-terminal end of the glucocorticoid receptor, 11
6β-Hydroxylase
distinct forms of hepatic androgen, induced in the rat, 219
25-Hydroxylation
microsomal, of vitamins D2 and D3 in pig liver, 97
17β-Hydroxyprogesterone
amniotic fluid, in early pregnancy, 315
3β-Hydroxysteroid dehydrogenase
activity in individual rat Leydig cells, 73
increasing, activity of human cumulus cells and granulosa lutein cells, 299
Hypothalamus
hormonal regulation of gene expression in, and identification of multiple novel estrogen induced genes, 131

Insulin growth factor(s)
androgen regulation of the, -I in rat uterus and liver, 57
role of, in steroid modulated proliferation, 1

c-*jun*
leucine zippers of, for progesterone receptor dimerization, 241

Leydig cells
3β-Hydroxysteroid dehydrogenase activity in individual rat, 73
Lymphocytes
in vitro differential effects of the antiglucocorticoid RU486 on the release of lymphokines from mitogen-activated normal human, 67
immunofluorescence of mineralocorticoid receptors in peripheral, 267

Lymphokines
release of, from mitogen-activated normal human, 67

Mammalian cell lines
transfection of human estrogen receptor cDNA into ER-negative, 229
MCF-7 cells
effects of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin in, 251
Mineralocorticoid(s)
receptor(s)
immunofluorescence of, in peripheral lymphocytes, 267
MMTV promoter
transcription from the, by two independent pathways, 21
mRNA
up-regulation of androgen receptor, by testosterone in both Harderian gland and thumb pad of the frog *Rana esculenta*, 259

*P*450c17 expression
post-transcriptional action of ACTH in the control of, in rabbit adrenal glands, 149
Peroxisome proliferator activated receptors (PPARs)
demonstration of similar tissue distribution of human and rat, but different responsiveness to PPAR activators, 157
Progesterone
effects of, on proteins of the hamster cervix secreted into the medium, 107
metabolism of, by guinea pig intrauterine tissues, 199
receptors
lack of evidence for, in human adipose tissue, 275
leucine zippers of c-*fos* and c-*jun* for, dimerization, 241
stimulation by androstenedione of, production in corpora lutea of pregnant rat, 191
Prostatic cancer cell line LNCaP
androgen metabolism in the, 89
Pseudohyperaldosteronism
presence of receptor-like activity in the autosomal dominant form and absence in the recessive form of, 267

Receptor(s)
epidermal growth factor
in the human endometrial adenocarcinoma cell line HEC-1-B, 41
estrogen(s)
androgen regulation of, in rat uterus and liver, 57
lack of evidence for, in human adipose tissue, 275
transfection of human, cDNA into ER-negative mammalian cell lines, 229
peroxisome proliferator activated (PPARs)
human and rat, demonstrate similar tissue distribution but different responsiveness to PPAR activators, 157
progesterone
lack of evidence for, in human adipose tissue, 275
leucine zippers of c-*fos* and c-*jun* for, dimerization, 241
glucocorticoid
genetic analysis of the N-terminal end of the, hormone binding domain, 11
high levels of non-activated, in $S49^{wt}$ mouse lymphoma cells incubated with dexamethasone, 33
microtubules are not required for, mediated gene induction, 143
nanomolar concentrations of untransformed, in nuclei of intact cells, 291
mineralocorticoid
immunofluorescence of, in peripheral lymphocytes, 267
RU 486
in vitro differential effects of, on the release of lymphokines from mitogen-activated normal human lymphocytes, 67

Sex hormone-binding globulin
interaction of, with plasma membranes from the rat epididymis and other tissues, 115

Sex steroid binding protein (SBP, SHBG)
binding of, to plasma membranes of human testis, 319
Sex hormones
consequences of challenge infections with *fasciola hepatica* on rat liver *P*450-dependent metabolism of, 209
Steroid(s)
gradients across the cancerous breast, 175
role of IGFs in, modulated proliferation, 1

Testis
binding of sex steroid binding protein (SBP, SHBG) to plasma membranes of human, 319
Testosterone
effects of, on proteins of the hamster cervix secreted into the medium, 107
up-regulation of the androgen receptor mRNA by, in both Harderian gland and thumb pad of the frog, *Rana esculenta*, 259
2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
effects of, on estrogen metabolism in MCF-7 breast cancer cells, 251
Transcription
two independent pathways for, from the MMTV promoter, 21

Uterus
progesterone metabolism by tissues in, of the guinea pig, 199

Vasoactive intestinal peptide (VIP)
effects of endogenous, on growth and steroidogenic capacity of rat adrenal zona glomerulosa, 81
Vitamins D_2 and D_3
microsomal 25-hydroxylation of, in pig liver, 97

We would like to express our deep thanks to the following people for their kind collaboration in reviewing papers for *The Journal of Steroid Biochemistry and Molecular Biology*:

Drs **R. W. Brown**, Edinburgh, Scotland; **G. Chetrite**, Paris, France; **R. Clarke**, Washington, U.S.A.; **C. L. Densmore**, Texas, U.S.A.; **C. R. W. Edwards**, Edinburgh, Scotland; **G. L. Hammond**, Ontario, Canada; **J. W. Honour**, London, England; **E. Johnson**, Victoria, Australia; **P. S. Kalra**, Gainesville, U.S.A.; **J. A. Katzenellenbogen**, Urbana, U.S.A.; **S. Kikuyama**, Tokyo, Japan; **C. Knabbe**, Hamburg, Germany; **K. Lee**, London, England; **W. C. Lichstensteiger**, Zurich, Switzerland; **J. G. Liehr**, Washington, U.S.A.; **N. MacLusky**, Ontario, Canada; **B. M. Markaverich**, Texas, U.S.A.; **J. I. Mason**, Dallas, U.S.A.; **C. Monder**, New York, U.S.A.; **P. H. Petra**, Seattle, U.S.A.; **D. Philibert**, Romainville, France; **M. J. Reed**, London, England; **J.-M. Renoir**, Bicetre, France; **F. F. G. Rommerts**, Rotterdam, The Netherlands; **M. G. Rowlands**, Sutton, England; **T. Saruta**, Tokyo, Japan; **G. Semenza**, Zurich, Switzerland; **R. J. Sherins**, Fairfax, U.S.A.; **P. M. Stewart**, Birmingham, England; **D. B. Tully**, Chapel Hill, U.S.A.; **Van Luu The**, Quebec, Canada; **C. K. W. Watts**, Sydney, Australia; **P. Weisz-Carrington**, Richmond, U.S.A.; **P. C. White**, New York, U.S.A.
